燕牌简介

杰作，基于品，始于心。

燕牌剪刀在2001年由美发剪刀专业生产厂家——日本吉沢剪刀厂创立，2006年6月日本吉沢剪刀厂海外工厂及子公司在中国成立。工厂的生产管理、加工工艺及技术要求等皆来自于日本人的一线管理，剪刀所使用的原材料及配件也都采用日本制品。经过几年的努力，剪刀厂生产推出松竹梅系列、DRY系列剪刀已经充分得到世界上众多美发师的认可和青睐。

燕牌剪刀秉承日本精湛锻造技艺精髓，集全球现代领先科技，以燕三条锻刀哲学立世著称，迄今仍散发着极致魅力。燕牌剪刀为满足新晋美发师的需求，研发和设计了燕牌双星系列剪刀，燕牌剪刀在研发设计工程中不断追求剪刀本身艺术美同时更注重美发师使用的绝对舒适。燕牌剪刀厂将把生产优质美发剪刀作为品牌不懈努力的方向和永远的目标。

TSUBAME scissors were created by the professional manufacturer of hairdressing scissors, the Japan Yoshizawa scissors factory in 2001. In June 2006, the overseas factory and subsidiary of Japan Yoshizawa scissors was set up in China. The production management, processing technique and technical requirements of the factory are under the Japanese technician's first level supervision. The material and accessories of the scissors are both imported from Japan. After years of efforts, the factory launches the TSUBAME scissors with a series of MATSU, TAKE, UME and DRY which have become full access to the world's recognition and a favor by most hairdressers. The production of exquisite quality hairdressing scissors will always be direction and goal for TSUBAME scissors.

深冷处理工艺 Cryogenic Treatment Process

深冷处理是指钢材在正常的热处理后1~1.5小时内将其进行-73°为止的急冷处理，使钢材整体硬度达到理想的均匀状态。未采用深冷处理的材料会出现整体硬度不均匀、容易变形的现象，从而导致成品剪刀的切削性能不稳定。

Cryogenic treatment is to quench the steel at -73° after normal heat treatment for 1 to 1.5 hours so to make the overall hardness of the steel at a desired even state. The steel without cryogenic treatment process will result in uneven hardness and deformation so as to cause the cutting function of the scissors unstable.

钢材的分类 Steel Category

Vg1 :成品具有硬度高、柔韧性强、抗磨损、耐腐蚀性强等特征。

Vg1: with properties of high hardness, flexibility, abrasion resistance and high corrosion.

Vg10 :VG1材料基础上添加了钴 (Co) 元素及提高了铬、锰元素的比例配置，提高耐磨损性、使剪刀的切削力持久。

Vg10: added Cobalt (Co) based on the material of VG1 and improved the ratio of chromium and manganese to improve abrasion resistance of the scissors and make the cutting function last longer.

大马士革钢：以纹理图案的精致及复杂程度，而定出质量的高低。因为能有精细天然纹理的，必是用最优质的钢材制造所得。

Damascus Steel: The quality is decided by its exquisite texture and complex pattern. The highest quality steel must be made by the natural exquisite texture.

Super G:剪刀用最高级用钢，热处理后硬度可达到62度以上包含多种优质钢材的特征，成本昂贵也是其另一大特点。

Super G: the highest class of steel for scissors with its hardness of over 62° after heat treatment. Contains the characteristics of a variety of high quality steel and high cost is also its major feature.

使用上的注意事项 Warning

剪刀非常锋利, 错误的使用不但会弄伤使用者的手指、还会影响剪刀原有的切削力, 需要十分注意。

1. 剪刀不要在剪发以外的工作上使用。
2. 剪发过程中如果碰到像梳子、发夹等坚硬物品时会造成刀刃的损伤。
3. 拇指按压指圈剪发是一个不良习惯, 这不但会造成单片剪刀的过度磨损, 也是容易患得腱鞘炎的直接原因, 请一定改正。

TSUBAMEscissorsareverysharp.Properhandlingisrequiredtoavoidinjuryanddamage.

1. Restrictusageofscissorstohaircutting.
2. Ensurethatalhairaccessoriessuchascombsandhairpinshavebeenremovedfromthehairbeforeusingthescissors;otherwise,bladeedgescouldbedamaged.
3. Avoidrestingyourthumbonthefingerringwhencuttinghair. Otherwise,thiswillresultonover-wearingofaspecificpart(s)ofthescissor,andalsoleadto tenosynovitisinthehand.

剪刀的日常保养 Routine Maintenance

1. 每次使用剪刀后必须及时将毛屑、污垢、水分等擦拭除去。
 2. 每天要给使用后的剪刀在螺丝、触点磨擦位、里刃部分涂上充足的润滑油。
 3. 绝对不要在剪刀未闭合的时候放置剪刀(因为可能会造成刀刃的损坏)。
 4. 调整剪刀螺丝时必须小心翼翼、特别注意的是不要将螺丝调整的过松(以免影响剪刀原有的力度)。
- 建议：每天都要保养您的剪刀, 这也是剪刀保持“锋利持久”的秘诀。

1. Wipeallfibers,haircareproductresidue,andmoisturefromthescissorsaftereachuse.
 2. Lubricatethescissor'sscrew,bladeandinneredgedaily.
 3. Keepthescissorsclosedwhenputtingthemandonthecounterorwhennotinuse;bladesmaybecomedamagedifscissorsareleftopen.
 4. Becarefulwhenadjustingthetension. Donotover-loosenthescrewwhenadjustingit;doingsocouldcompromisethescissors'abilitytocut.
